

New revolutionary table station provides a safe “Least Restrictive Environment”.

The Active Life Station™ is perfect for:

- Occupational therapy
- Speech therapy
- Homework
- Video games
- Watching TV
- Playing games
- Computers

and... it is fun.

The Ability to Turn Around. It seems like a simple thing to do but it can be so difficult for some people. When a child can play with their friends then turn to work with their computer or TV then turn to eat with their family, *it can turn around their life.* The Active Life Station™ creates an interactive environment for children and adults who may otherwise require constant supervision. It helps the caregiver have more freedom to prepare meals, retrieve medication, or tend to other people. The child can have everything needed for school, therapy, and entertainment in one convenient location. The Active Life Station™ provides peace of mind that a child in need of constant supervision is in an entertaining, therapeutic and safer environment.

Reasons for the Active Life Station

1. Inclusion in daily home or school activities
2. Reduction in spasticity in upper extremities.
3. Development & improvement of upper body balance & strength
4. Alleviation of pain caused by prolonged or inappropriate positioning
5. Increase independence & self-image
6. Decrease fatigue from inactivity
7. Help prevent depression
8. Facilitates more effective speech and occupation therapy
9. Reduces the need for protective head gear
